

Viktor Batalov

Profile

The experience I have accumulated will help me solve any problem!

Work Experience

Principal Open Mining Planning Department Specialist Ural Mining and Metallurgical Company

📅 06/2023 – 01/2024 📍 YEKATERINBURG, RUSSIA

My responsibilities include the estimation of ore reserves, conducting economic assessments to determine the most appropriate method for the development of deposits, planning of long-term and medium-term mining operations, and comprehensive risk evaluation.

Head of the Mineral Resources Evaluation Department Polymetal

📅 12/2013 – 06/2023 📍 SAINT PETERSBURG, RUSSIA

I was responsible for the geological-mathematical modeling using Studio RM Micromine, economic evaluations for deposit development methods, auditing and analyzing mineral resource changes as part of the annual and medium-term planning processes, risk assessment, pit designing using NPVS Studio OP Micromine, and the formation and operational control of long-term and medium-term mining plans.

Mining Specialist Rusburmash

📅 09/2009 – 12/2013 📍 IRKUTSK, RUSSIA

My duties included geological-mathematical modeling and mining-technological modeling of Thermal Power Plant (TPP) deposits, along with the preparation of state reports and reserve calculations under technical economic analysis (TEA) conditions.

Senior engineer Irgiredmet

📅 02/2006 – 09/2009 📍 IRKUTSK, RUSSIA

My main tasks were the technical and economic evaluation of placer deposit developments, designing and development of placer deposits, and providing engineering support for project decisions related to the development of such deposits.

Mining Foreman Amurstar-1

📅 06/2003 – 02/2006 📍 BLAGOVESHCHENSK, RUSSIA

The cooperative specialized in the placer mining of gold, a process that I was deeply involved in, leading a team responsible for extraction activities. In this role, I ensured strict adherence to safety, labor protection, environmental regulations, and managed the preparation of annual mining operation plans.
